PROFILE

Software engineer specializing in C++ and real-time systems, with experience in a production environment at Ubisoft.

With a background in video game development, I have developed strong expertise in real-time interactive systems, debugging, and performance, transferable to complex software environments.

SKILLS

Engines : Unreal Engine (C++/Blueprints), Unity (C#) · **Technical Languages**: C++, C#

Gameplay Systems : 3C/game feel, state machines, UI/HUD, tool, debug.

Tools: Perforce, Git/GitHub, profiling/debug, ImGui.

Soft Skills : leadership, public speaking, design thinking, teamwork, autonomy, client-facing communication

Languages: French (native), English (professional).

EXPERIENCE

Gameplay Programmer (Systems) — Ubisoft Québec

Ubisoft Québec

Sep 2025 - Feb 2026, Québec, Canada

- Developed and maintained exploration gameplay systems and tools in C++ on a proprietary engine (Anvil), shared across 5 AAA productions.
- Built an ImGui debug/visualization panel on top of an existing 2D map, enabling teams to inspect, filter, and debug points of interest and related world markers (faster investigation and iteration)..
- Updated a shared filtering module into a reusable component (dedicated class + cleaner API), removing duplication between tools and improving long-term maintainability.
- Collaborated daily in a cross-studio environment and participated in code reviews (Swarm), incorporating senior feedback.
- Contributed to production-quality standards: coding guidelines compliance, cleanup/tech debt reduction, and QA coordination (test requests + fixes for reported edge cases).

AR/VR Developer — Wilkins Avenue AR

Wilkins Avenue AR

Mar 2023 - Aug 2024, Paris (La Défense), France

- Conducted AR R&D and prototyping on Meta Quest 3, improving Unity workflows and integrations.
- Designed and shipped “[Out There](#)” (10,000+ downloads, #1 in its category).
- Integrated Meta XR SDK / PolySpatial, adapting experiences for Apple Vision Pro and Meta Quest 3.
- Delivered client demos to 150+ professionals (e.g., L'Oréal, Cartier) and represented the company at VivaTech (180,000+ attendees).

PROJECTS

Gameplay Programmer - Couch Co-op Game (Space Penguin Arena)

IIM · kaizensam.itch.io/space-penguin-arena · Sep 2023 - Dec 2023

- Implemented movement and attack mechanics in Unity for responsive gameplay feel.
- Built a “Point Area” system to increase competitiveness and match dynamics.
- Integrated VFX/animations to enhance player experience.
- Presented the project 5+ times with positive stakeholder feedback.

Gameplay & Multiplayer Programmer — First-Person Shooter (Mirror & AWS)

Personal Project · antoinedirion.myportfolio.com/fps · Jan 2022 - Jan 2023

- Implemented core FPS mechanics (movement, shooting) and advanced features (wall ride, jump pads).
- Built a lobby system and multiplayer synchronization (Mirror, AWS); hosted sessions with 100+ players and ran a tournament with 40+ players.

SELECTED GAME JAMS

Gameplay Programmer — Mobile Game (Global Game Jam)

- Built a mobile game in 48-72 hours (team jam) and shipped a playable, published build.
- 500+ downloads; received the “Jury’s Favorite” award at a competition in France.
- Participated in a major international event (35k participants, 97 countries, 12k games).

Gameplay Programmer — Ludum Dare Jam Entry (itch link)

- Shipped a playable prototype in 48-72 hours: designed and implemented a mini-game loop.
- Ranked 485 / 2939.

Game Jams (12x) — Shipped prototypes (Unity/Unreal): rapid prototyping, scope management, and team iteration (personal + school projects).

EDUCATION

Master's-level Program in Computer Science (Game Development) — Canada

Université du Québec à Chicoutimi (UQAC) • Chicoutimi, Saguenay • 2024 - 2026

- Double-degree program. Relevant coursework: Game Networking, Cybersecurity, Mobile Platforms, Advanced OOP, 3D Interaction & VR, Project Management, Serious Games.

Bachelor (ECTS 180) & Master's (ECTS 120) Game Programming - FR

IIM • Nanterre, France • 2020 - 2026

- Relevant coursework: game feel, 3C design, Unity, Unreal Engine, OOP, QA, and tools programming.

INVOLVEMENT

Student Association President

IIM • LéoIndieGames • April 2021 - May 2024

- Organized 2 tournaments (60+ participants) and supported participation in a regional festival.
- Managed association operations and administration.
- Negotiated and maintained 10+ partnerships to increase visibility and resources
